WORLD ENVIRONMENT DAY – 2023

5th June 2023

Report on Activities undertaken

World Environment Day is being celebrated every year on 5th June since 1973. This is one of the largest platforms for promoting actions to protect the environment so as to facilitate the peaceful dwelling of all living creatures. The theme of 2023 World environment day is “Ecosystem Restoration”. This includes the process of reclaiming habitat and ecosystem functions by restoring the lands, waters and air that support plant and animal life. As part of the World Environment Day 2023 celebrations at Government College of Engineering Sengipatti, Thanjavur, tree saplings are planted. The awareness about the ecosystem restoration is carried out through tree sapling plantation, initiated by the Principal – Dr. S. Jayabal, Government College of Engineering Sengipatti, Thanjavur followed by other faculty members and students. The geo-tagged photographs of the event and other photographs are attached to witness the celebrations at Government College of Engineering Thanjavur.
